

Welcome to GreenStand. If you have made it to this page, you are interested in having an impact on our world. About 1.4 billion people live in extreme poverty while deforestation is one of the largest source of greenhouse gasses. There is a way to rebuild some of the most difficult environments on earth while providing hope and opportunity for many of the world's poorest! We love having you onboard!

GreenStand - Privacy Policy

At GreenStand we have absolute respect for your privacy and will continue to do everything within our power to protect it. We hereby disclose GreenStand's privacy practices concerning the data we collect.

Project Related Data:

GreenStand upholds an open scientific data policy and intends to make any scientific finding that may positively affect the environment / social well being freely available. Using data we receive through user inputs on our mobile applications, website and database systems, we intended to identify problems, solutions and trends in environmental/social health. By using our services, you are thereby agreeing to allow us to publicly display any project related data and scientific findings. If your data is of a more sensitive type, please contact us and will act accordingly.

How We Collect Data:

- Mobile Applications:
 - Photos: time-stamped, Geo-tagged.
 - User entered information: name, email address, organization name, phone number.
 - App settings for users
 - Application analytics: software crash reports, phone models
- Website Application: Database entries, general analytics etc..
- Donor supplied information

How We Handle Data:

Our goal is to use data to create a greener earth and help alleviate poverty. We believe that the scientific and project related data we collect should be freely available to the public. Our primary data collection is focused around scientific research and creating a transparent system to collect field data related to the survival processes of trees as well as any information related to the systematic harvesting of tree related products. This information includes planter

geo-tagged, time-stamped photos and other user entered data.

By using our services, you are agreeing to allow us to use your environmentally related information and make it publicly accessible via our website. User's first name and/or organization name may be displayed with the corresponding tree data. With prior consent, other user related information may be displayed. Upon request all user data may be hidden from public view. Phone numbers and/or email addresses may be used by GreenStand to contact relevant planters, but will never be shared with third parties without prior consent.

User Data We Collect:

Information relating to individual users or organizations will not be disclosed without prior consent. We are handling all user related data (full name, phone numbers, email) securely using modern cryptography. Planter's full names and contact information will never be shared without prior consent.

- **Personal Information:** On our tree tracker app we require a name, and email, and optionally a phone number and an organization name. All personal data is stored in a secure database.
- **Mobile App users:** Our mobile apps collect the following personal information: User entered information: name, email address, organization name, phone number.
- **Donor information:** When you make a donation we collect information that is used solely for accounting, tax reporting and donation processing purposes. This information is guarded with utmost care and will not be sold, shared or traded with any other entity. In accordance with IRS requirement to disclose limited information that must be available on public taxes records for donations over \$5000. Donor information may also be disclosed at the donor's request. We collect the following donor information: name, address, amount of donation, any other personal information given to us.

User Photos:

The backbone of GreenStand's tree tracking program runs on the collection of time stamped, geo tagged photos. This information is stored in a secure database from which it is displayed in the form of a tree map. We also use this information to generate statistics related to tree planting. We are only interested in tree related photos, please don't send us anything else. With the proper use of this system, all photo taken relate to environmental data and GreenStand does not consider or treat uploaded photos as "user data." By using our mobile application you are agreeing to allow us to use your photos.

Changes to the Policy

It is our intent to hold the principles of this policy, but we do understand there may be a need to change it from time to time. If we do we will post an updated copy immediately on our website.

Google's Guild Lines:

"User Data

You must be transparent in how you handle user data (e.g., information provided by a user, collected about a user, and collected about a user's use of the app or device), including by disclosing the collection, use, and sharing of the data, and you must limit use of the data to the description in the disclosure. If your app handles personal or sensitive user data, there are additional requirements described below. This policy establishes Google Play's minimum privacy requirements; you or your app may need to comply with additional restrictions or procedures if required by an applicable law."

Personal and Sensitive Information Privacy Policy & Secure Transmission

If your app handles personal or sensitive user data (including personally identifiable information, financial and payment information, authentication information, phonebook or contact data, microphone and camera sensor data, and sensitive device data) then your app must:

Post a privacy policy in both the designated field in the Play Developer Console and from within the Play distributed app itself.

Handle the user data securely, including transmitting it using modern cryptography (for example, over HTTPS).

The privacy policy must, together with any in-app disclosures, comprehensively disclose how your app collects, uses and shares user data, including the types of parties with whom it's shared.

Google Not applicable yet. "Activity Requirement

If your app handles financial or payment information or government identification numbers Then it must never publicly disclose any personal or sensitive user data related to financial or payment activities or any government identification numbers.

If your app handles non-public phonebook or contact information We don't allow unauthorized publishing or disclosure of people's non-public contacts.

Prominent Disclosure Requirement

If your app collects and transmits personal or sensitive user data unrelated to functionality described prominently in the app's listing on Google Play or in the app interface, then prior to the collection and transmission, it must prominently highlight how the user data will be used and have the user provide affirmative consent for such use."

Charaty Navigator Privacy Policy:

Our Commitment to Our Donors

We will not sell, share or trade our donors' names or personal information with any other entity, nor send mailings to our donors on behalf of other organizations.

This policy applies to all information received by Charity Navigator, both online and offline, on any Platform ("Platform", includes the Charity Navigator website and mobile applications), as well as any electronic, written, or oral communications.

To the extent any donations are processed through a third-party service provider, our donors' information will only be used for purposes necessary to process the donation.
